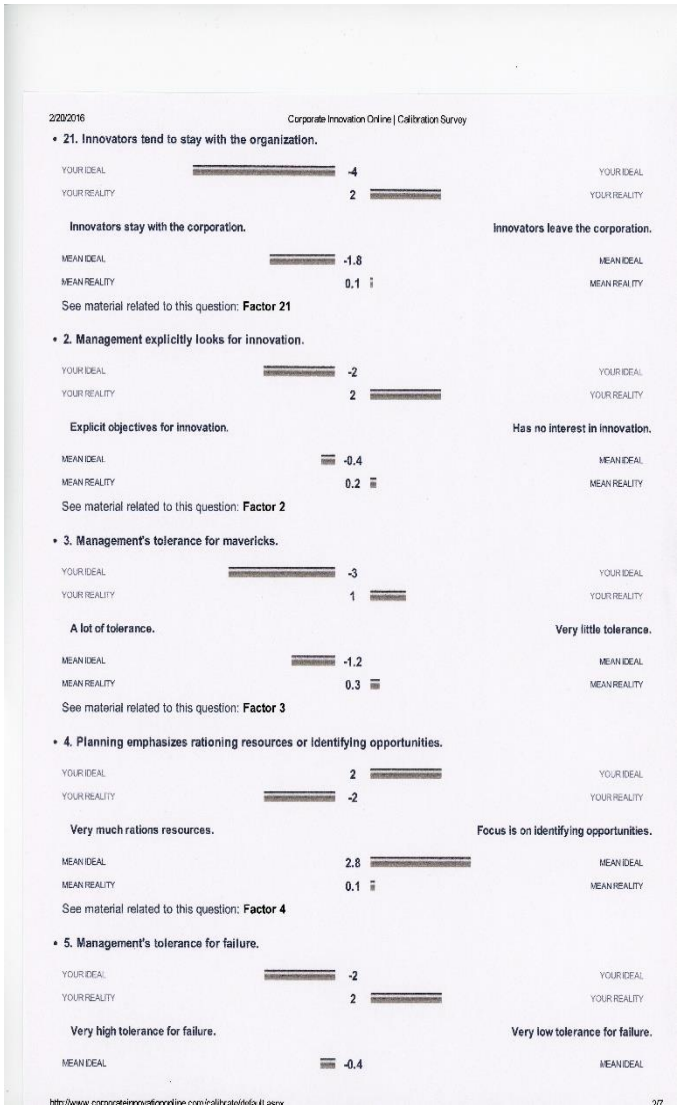
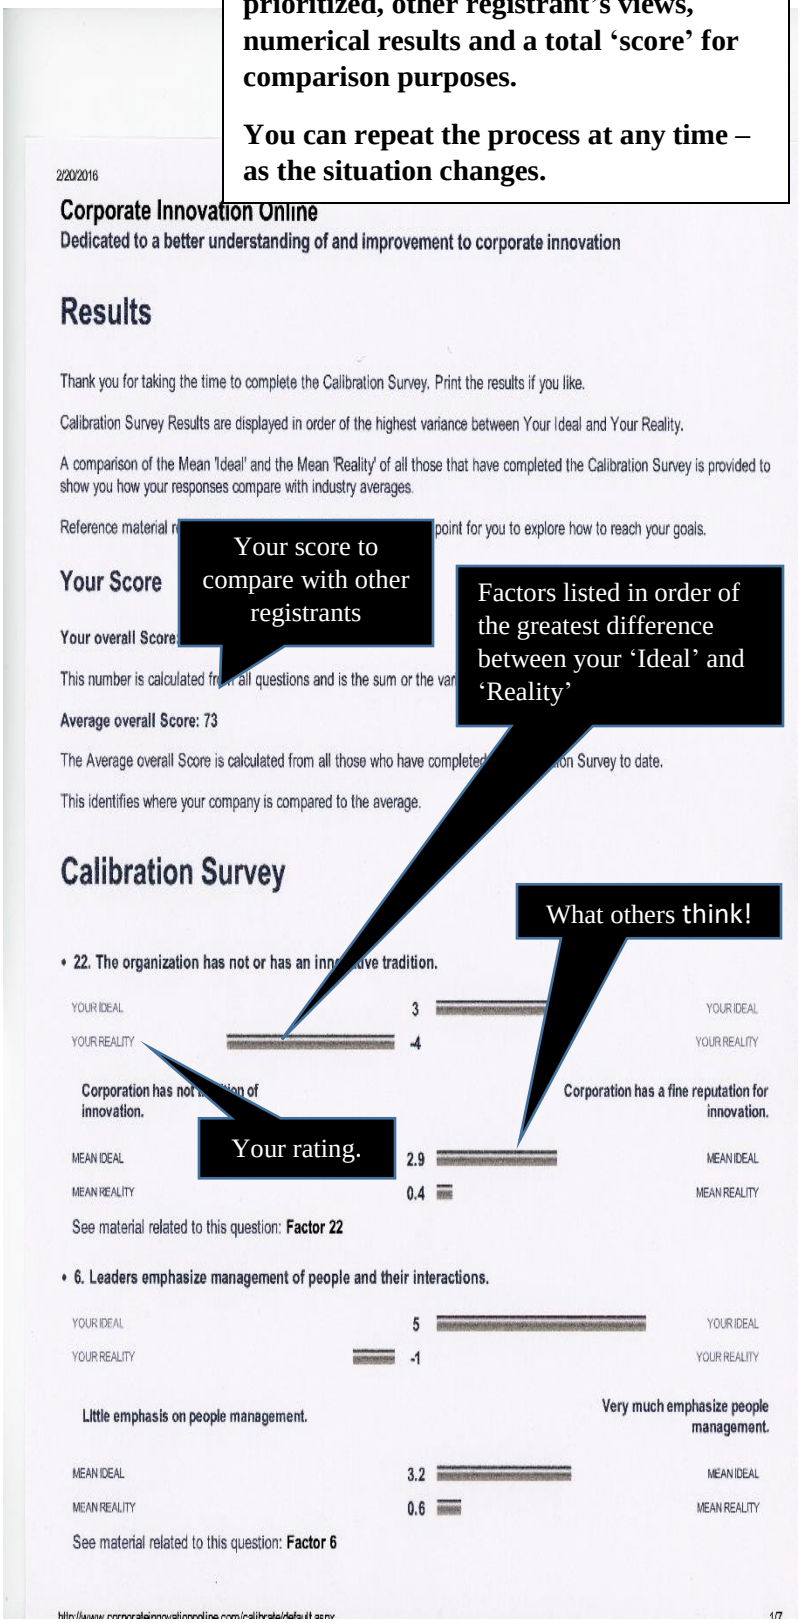
# CIO – Corporate innovation online
# Innovation management best practices

## An example of the report which you will receive when using the online lab.

*Note; this is only an example of the first two pages of your six-page report which covers all of the twenty-five Factors.*

*This example is from CIO's data base and reflects one opinion on one company. No reference is made to the registrant nor to the name of the company.*

**For each Factor, you receive your ratings prioritized, other registrant's views, numerical results and a total 'score' for comparison purposes.**




**You can repeat the process at any time – as the situation changes.**
